THE REDCLIFF REVIEW. THURSDAY, MARCH 20, 1930

Number 2

## St. Patrick's Concert Pleases Large Audience

Splendid Program Put on by Local Talent

Every available foot of space in the Gordon Memorial School room was required to accommodate the large crowd which turned out to the St. Patrick's concert last Tuesday evening, given under the auspices of the Ladies Aid of the Congregation.

The program, which was put on almost entirely by the younger talent of the town, was of an Irish nature throughout and was made up of Choruses, trios, Solos readings, humorous Selections and drills.

As about twenty-five took part and as every item was exceptionally well rendered, space will not permit us to deal with each item separately. Suffice it to say that we have never before heard a more appreciative audience, nor more kindly and flattering remarks passed by an audience after any performance. That the large gathering thoroughly enjoyed the program was clearly shown by the unstinted and hearty applause after each item.

A feature which was much commented upon was the number of young people taking part and the very able manner in which they acquitted themselves.

The ladies Aid have a reputation for introducing some new talent at each of their entertainments and this one was no exception.

On this occasion Mrs. L. Shimmom made her first appearance before a Redcliff audience, and the manner in which she entertained the audience showed her to be a real acquisition to the town's talent. Mrs. Shimmom is an amusingly versatile Elocutionist of rare ability. Then there were the teeny age boys, many of whom made their first appearance before the footlights and who did so well that they may be expected to be called upon many times in the future.

We know that girls don't like to be praised but at the risk of offending them we are forced to say that their contributions to the program were just grand. The trio of Irish airs by Miss Morrison and Miss Hill of Medicine Hat and Miss McWane were a treat and were thoroughly enjoyed, while the paper on Irish music by Miss Mitchell was intensely interesting and well rendered. The duet by Mrs. Caine and Mrs. Morton, Mrs. Tracker's recitation, Miss McWane's solo Miss Morrison's solo, Mr. Yaw's solo, Mr. Cooke's violin selection and Sam McClear's comic selections were all rendered in the usual pleasing manner which has characterized these artists in the past.

During the evening Rev. Mr. Blackburn brought greetings from Medicine Hat and gave an interesting address on Ireland and its people.

At the close of the program Mr. A. N. Collard, on behalf of the Ladies' Aid and their entertainment committee, thanked all who contributed to the program, and all present for their support. On the whole the evening was a great success, as a result of which the Ladies' Aid will reap slightly over \$100.00.

St. Ambrose B. W. A. will be having their annual Spring sale April 23rd.

## Pioneer of Bingville Passed away Sunday

Mr. Peter Herald Succumbed to Attack of Pneumonia.

Mr. Peter Herald, one of the pioneer farmers of the Bingville district passed away in the Medicine Hat hospital last Sunday after an illness of only a few days.

About twenty-one years ago he came to Canada from Forfarshire Scotland where he was born 74 years ago. For a time he resided in Manitoba and later made a trip to British Columbia. About 19 years ago he returned to the prairies and took up a homestead in the Bingville district where he has resided ever since. Last fall he moved into Redcliff for the winter, but a week ago he contracted double pneumonia which had advanced to such a stage that no hopes were entertained for his recovery.

The late Mr. Herald was a type of those fine old gentlemen who are now rapidly passing on. He was a good farmer and a highly respected citizen in his district. Despite his advanced years he took a keen interest in all local happenings and for a number of years past was Secretary-treasurer of the Bingville Social district. On occasional social gatherings he frequently entertained the company with Scotch songs which he sang with great feeling.

Decceased was a bachelor and had no relations in this country. The funeral took place Monday afternoon at Medicine Hat cemetery where Rev. W. B. S. conducted the service. The pall bearers were Messrs. W. A. Pratt, A. Ransing, J. McLachlan and J. Marr, all of the Bingville district.

Last Monday G. N. Pearson's Store was broken into again. Several pairs of boots, overalls and Socks were missing in the morning.

## Town Football Dance Was Great Success

Chiff Hall was the scene of a jolly crowd for the Whist Drive and Dance given last Monday Evening by the town football club.

The Whist Drive was highly contested all the way through and great interest was taken in the result. The following were the winners:

Ladies first—Mrs. Doore. Ladies Second—Mrs. Lakey. Gent's First—W. Champ. Gent's Second—H. Turner. Consolations—Mrs. Carstairs and Mr. Drinkwater.

During the evening the spot dance created interest and amusement. The partners winning the prizes were Mr. and Mrs. Ray Towle, and Evelyn Cooke and Sid Wortz.

The evening was a great success, netting the club about \$40 to the good. The committee in charge of the event wish us to extend their hearty thanks to the merchants who contributed prizes, the ladies who assisted with the lunches and the public for their patronage.

## Good Shows Coming To Cameo Next Week

The popular screen dog, Rigger, figures prominently in the picture, "Swift Shadow," to be shown at the Cameo next Monday evening. "Backfire the comedy that night is a scream. The story of "Forbidden Love" which will be shown on Thursday, tells of a princess who meets and loves a man of common blood. She is about to marry him when she learns that she has inherited a throne. She sacrifices love for her country and this brings about a series of dramatic incidents. The climax is tremendously strong and appealing.

Lili Damita, the star of the picture, is recognized as one of the most beautiful screen stars of Europe.

## Brethren Mission Has Paid Deficit

(Contributed)

The Church of the Brethren (Dunkers) just completed successfully a campaign to pay its mission deficit of six years standing.

Rev. Charles D. Bousack, General Secretary of the General Brethren Board releases news that the mission deficit is completely paid and there is a surplus to carry into the new year. Since 1923 the Church of the Brethren (Dunkers) has carried a deficit amounting to nearly \$1.00 per member. The Church membership is 133,000. During 1929 two laymen J. J. Oller of the Landis Tool Co., Waynesboro Penna., and J. K. Miller of the Martin Dry Goods Co., Cedar Rapids, Iowa, challenged the Church to pay the deficit. Other laymen joined these men in paying half the amount needed.

The life for the congregation to complete their half was February 28th. By that date the deficit was raised with a balance of \$25,000. The last three days of the year brought \$14,000. The membership is 70 per cent rural. On the days when wheat was touching its lowest price for 16 years the largest missionary response was given. The Church of the Brethren has more than 100 missionaries in its fields in India, China, and Africa.

## Salvation Army Lecture Postponed

Last week we announced that Brig. Gen. Smith of the Salvation Army would be in Redcliff on Monday, March 24th to give an illustrated address on Indians in Northern B. C. Since then it has been found impossible for the Brig. Gen. to be here on that date owing to other pressing demands for his lecture. He will be here in Chiff Hall, however, on Thursday evening, April 3rd.

## Village of Suffield Is Now Disorganized

Is added to local Improvement District No. 133.

The Alberta Gazette announces that from January 1st, 1930, "the village of Suffield is hereby disorganized, and that the lands which were within the boundaries of said village be and are hereby added to Improvement District No. 133, and are made subject to taxation by the Department of Municipal Affairs, under the provisions of the Improvement Districts Act for the current year. Further, that the arrears of village taxes outstanding against the lands in the said village from assessments levied by the village shall remain a charge against these lands and be payable as taxes due the Department of Municipal Affairs in the same way as if they had been levied by the said Department in trust for Improvement District No. 123. Further, that all tools, implements or other property formerly belonging to the said village shall now become the property of the Department of Municipal Affairs in trust for Improvement District No. 123.

## TEACHERS' PENSIONS AGAIN SIDETRACKED

Efforts of Hector Lang, member for this constituency, to have a committee appointed to inquire into the whole question of superannuation of teachers, went for little on Monday when the House by a vote of 35 to 11 rejected his resolution to this effect.

The main objections to the resolution were advanced by Premier J. E. Brownlee, who stated quite frankly that he did not think the time was opportune for the institution of a teachers' pension scheme, having in mind the financial conditions of the province. Furthermore, he submitted that none of the schemes so far suggested was satisfactory and that none of the schemes in vogue in Eastern provinces was entirely acceptable.

## VETERANS ASK FOR EXTENSION OF TIME

A definite request that the time limit for returned soldiers insurance applications be extended and for changes in the regulations, will be placed before the parliamentary committee on soldiers affairs under the direction of Lt. Col. L. R. Lafche, president of the Canadian Legion, on behalf of all the Veterans of Canada.

The present time limit for applications expires August 31.

While engaged at his work in the Dominion Glass plant last Friday night, Robt. Johnson had an experience which he will not soon forget. Standing beside the lohr his clothing caught in a set screw and in less time than it takes to tell about it all his clothing, except his shoes and socks, were torn from his body. Robert was also forced to turn a few summersaults, but was fortunate in escaping without any serious injury. His right arm was badly scraped by coming in contact with a fly wheel and he had several bruises about the body. It was a miracle, that he was not more seriously hurt.

## May have Airplane Factory in Redcliff

The Review understands that plans are now under way to start a plant in Redcliff for the building of Airplanes and to increase facilities for the carrying on of the School of instruction for Aviators.

According to rumor a Company is being formed to take over the old Shoe Factory from present owners and with such additions as are necessary, turn it into a real plant for the Manufacturing and assembling airplanes. We understand that Calgary Capital is interested in the venture and that the prospects are that other buildings in town will be utilized by the company.

A dance and social evening is billed to take place in the Harvest Vale School on Friday evening, March 21st under the auspices of the Harvest Vale U. F. A. A good time is assured. All are welcome.

In the legislature last Monday there was a lengthy discussion on a resolution to raise the age limit for boys working in or about the surface working of a mine, from 14 to 16 years. The act as at present says that boys under 14 cannot be employed at this work. Since there is a law on our Statute saying that all children must attend school until they are 15 years of age, how does it come about that another law needs to say that persons under 14 years of age may work any place.

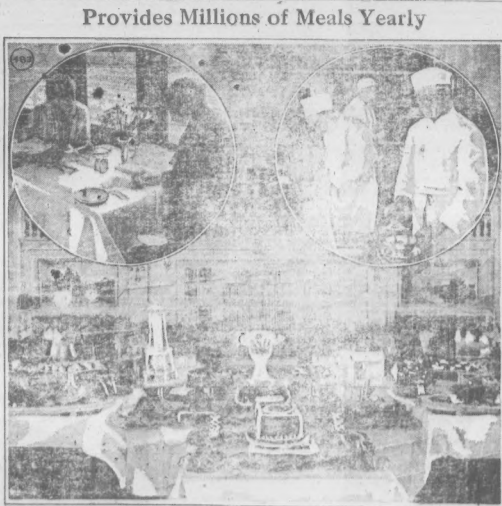

## Churches

ST. MARY'S CHURCH  
Celebration of Mass second and fourth Sunday of each month at 8:30 a. m.

GORDON MEMORIAL UNITED CHURCH  
Rev. W. B. Smith, Pastor  
10 a.m. Church School.  
11:15 Morning worship.  
"Enlargement of Life in Christ."  
7:30 P. M. Evening Worship.  
Subject the Practical Usefulness of Christian Faith.  
Midweek service on Wednesday at 7:30 p. m.  
Anniversary services on 30th March. Rev. W. H. Irvin, of Taber, will preach both services.

CHURCH OF BRETHREN  
Rev. Ira M. Zeigler, Pastor.  
Services Every Sunday.  
Sunday School 10:30 a. m.  
Morning service 11:30.  
Evening service at 7:30.  
Choir practices every Thursday evening at 7:30.  
Everybody welcome. A special invitation is extended to those who have no church home or do not attend any Sunday school.

ST. AMBROSE CHURCH  
Rev. J. L. Cooper  
\* \* \*  
Third Sunday in Lent March 23  
Holy Communion 8 a. m.  
Sunday School 10 a. m.  
Matins and Service 11 a. m.  
Subject: "The Station."  
Evensong, litany and sermon 7:30; subject "Jesus Christ of Witness."

About 12,500,000 meals a year are served to travelers by the Canadian Pacific, which is the equivalent of saying that it provides 37,000 every day and 1,000 every week of the year. This gigantic total is made up of about 4,200,000 in dining cars and station restaurants; 1,400,000 on Atlantic and Pacific steamships; 1,250,000 on inland and coastal steamers; and 5,650,000 in the company's hotels and bungalow camps. Lay-out shows first-class dining car on "Empress of Australia" built for two on typical trans-continental Canadian Pacific layout and taken on C.P.R. dining car with the men in action behind the guns.

## Work Together For Prosperity

As a direct result of the partial crop failure experienced by the three prairie provinces last year, and the disastrous "break" in the stock markets which, although long predicted as inevitable, nevertheless caught thousands of people unawares and resulted in enormous losses to many, there developed a feeling of depression and uneasiness throughout Canada and the United States.

Coming in a year, during the first nine or ten months of which employment in Canada reached a higher peak than ever before in the history of the Dominion, with greater industrial activity, more development work done, and larger building programs carried out, the country witnessed the paradox of a greater degree of unemployment when winter set in. Although seasonal, and therefore temporary in character, this situation added to the prevailing depression.

Finally, the world's wheat situation became the cause of deep anxiety and concern in Canada because of the fact that this Dominion is now the chief exporter of wheat among the countries of the world. Canada was not the only country which produced an exceptionally large wheat crop in 1928, and when the Argentine crop was thrown on the market—it has to be marketed and sold as soon as it is harvested—a condition existed which necessitated either a drastic drop, or selling it in competition with the Argentine at a price which would have yielded less than the actual cost of production. Wistfully, the Wheat Pool and other Canadian exporters, supported by the banks, withheld their wheat from export unless, and until, a fair price was obtainable. As a result transportation interests suffered for the time being, export trade declined, and some uneasiness developed because of the unprecedented situation.

For a time the croakers, pessimists and preachers of bad ruin had their sayings, and the more they talked, and homed, the larger became the number of people inclined to shake their heads. Nevertheless, the economist of the situation were substantially sound. It was largely a "state of mind," a mental depression which afflicted many people.

If any one is inclined to challenge this statement, let him examine the situation more closely.

For example, the first day's showing of the new 1930 model by a well known manufacturer of automobiles in Canada and the United States brought in \$200,000.00 in orders.

Despite the degree of unemployment existing in Canada, it is less than in any other country, and the actual number of those employed is greater than in any previous year.

The Canadian National Railways have placed, or shortly will place, orders for new equipment and embark on a programme of extensions, involving larger expenditures than in past years.

The C.P.R. has just announced a programme of extensions, betterments, and purchase of new equipment for 1930 involving the expenditure of \$50,000,000.

All Western Governments are planning highway construction programmes in excess of anything attempted in any one year in the past.

Building programmes in the larger cities are in course of preparation which will equal, if not surpass, the high records of 1929, which outdistanced all former years.

There has not been a bank failure in Canada, all our large insurance and financial companies are sound, all the large industrial concerns are busy and prosperous, our mineral production increases in volume and value every year, the peace of the world never appeared more assured than at present.

Then what is there to worry about? Nothing. All the people have to do is to throw off their mental depression, and the fog will be lifted and disappear.

Governments and Big Business are doing their share not only to keep the country busy and prosperous, but to speed up business and increase prosperity. It remains for the individual man and woman to do likewise. If each individual citizen does this or her share by tackling the particular piece of work close to their hands in 1930 and will prove one of Canada's banner years.

Let every workman take his little keener interest in his job, throw a bit more energy into it, strive to perform somewhat better work, in a word, give the best possible value in work for the wages received, and the effect will be startling.

Let the farmer tackle his problem with renewed energy, and confidence will come. Every man method improved, every vigorous onslaught on noxious weeds, every cow, pig or hen added to the farm, every little vegetable garden planted, will make for profit, contentment and progress.

New energy and enterprise by every merchant, the adopting of new and better methods, scrapping the old and obsolete and introducing something new and better, will make for progress, greater turn-over, larger profits.

Let everybody work together for prosperity in 1930, and prosperity will be assured.

## Completes Daring Flight

Calgary Aviator Succeeds In Two-Way Hop Across Rockies' Highest Peaks

Back from a daring flight from Calgary to Vancouver across the highest peaks of the Canadian Rockies, Flying Officer W. L. Rutledge, Calgary aviator, brought his Curtiss-Robin monoplane to earth at the municipal airport. He was accompanied by Percy J. K. Payne, secretary-treasurer of Rutledge Air Service, Limited.

The tier, quailed the belief that a forced landing, in the mountains meant death. There were many places where a forced landing could be made and many others where landing fields could be built.

No longer need the mountains be barriers in the development of aviation between the prairies and coast cities, he said. An air mail and passenger service could be operated, he said, and the trip between the two cities made in four hours.

The time the flight from Merritt, B.C., where the aviators were delayed for a few days because of fog, was made in 10 hours and 55 minutes, covering slightly over 300 miles.

## WHY SUFFER

## FROM ANEMIA

## When Health and Strength Can Be Obtained Through Purifying the Blood

Anemia is the medical term for this, watery blood. The sufferer looks pale, has no energy, is tired, is seized with shortness of breath and has a general feeling of weakness and exhaustion. The least work becomes a burden and life does not seem worth living. Anemia is not a disease that can be neglected. Unless checked it will steadily grow worse. What is needed to combat this trouble is a good blood tonic, one that discards the right to the root of the trouble and imparts all impurities from the blood. Such a tonic is Dr. Williams' Pink Pills—That famous blood-builder and strength restorer.

Mrs. John Bain, Avenue Road, Toronto, writes for a number of years I was in an anemic condition and on my doctor's advice I took Dr. Williams' Pink Pills, she wrote as follows:

"For upwards of seven years I suffered from an anemic condition. I was so pale my friends feared I was going to die. I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

"I had a terrible summer. My hands and feet were cold and my head was in pain. I was so weak I could not do my work."

VAPORUB  
OVER 15 MILLION JARS USED YEARLY

## Situation Is Altered

Canada Gets Bananas From West Indies Free Of Duty

Canadians consume a lot of bananas—approximately one bunch or stem to each three persons annually. We used to buy them second-hand from or through the United States.

The Canada-West Indies trade agreement, passed in 1925 and proclaimed some time later, has greatly altered the situation. Jamaica has been doing a big business with this country as bananas, as well as other tropical fruit, bananas from the British West Indies are duty-free, as against 50 cents a stem if imported from other countries.

## Recipes For This Week

(By Betty Barclay)

## SAVORY SPINACH SALAD

1 package lemon-flavored gelatin.  
1 cup boiling water.

1/2 cup spinach juice or water.

3 tablespoons vinegar.

1 teaspoon salt.

1 1/2 cups cooked spinach, chopped and drained.

1/2 teaspoon onion juice or grated onion.

Dissolve gelatin in boiling water.

Add spinach juice, vinegar and salt.

Chill. When slightly thickened add spinach and onion juice. Turn into mold. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise and slices of hard-cooked eggs. Serves six.

## ORANGE PIE FILLING

1 cup sugar.

1/2 cup corn.

1/2 teaspoon salt.

Grated rind 1 orange.

1 cup orange juice.

1/2 cup lemon.

2 tablespoons butter.

2 eggs.

Mix sugar, flour, salt and grated rind; add fruit juice, and cook in double boiler ten minutes, stirring until thickened and softened. Cool.

Add butter and egg yolks beaten light; cook two minutes, and cool.

Finish like lemon pie.

## Get Salary Boost

Nearly 1,000 Civil Servants Are To Get Wages Increased

Close to one thousand employees of the Dominion Government's income tax branch are gladdened by announcement of an increase in salary of \$120 a year, effective from April 1.

When the new fiscal year will begin. This applies to the service from Halifax to Vancouver, or at least to those who have not already received such an advance.

## Adding Insult To Injury

The gigantic truck, collided with a minute private car.

"You fool," shouted the owner of the latter, jumping out and shaking his fist at the truck driver. "Do you mean to tell me that you couldn't see me coming on a straight road like this?"

The other smiled.

"I'm sorry," he said. "I couldn't be helped. You see, I thought your car was a fly on my windshield."

It seems now that the only way to get rich quick is slowly.

## Grandmother Knew—She Used Milburn's

MILBURN'S HEART NERVE PILLS

It is now over three years since I have had a spell.

I hope anyone who is in the same condition I was will give it a try.

A fine trial.

Price, 50c. a box at all druggists and dealers, or mailed direct from price by The T. Milburn Co., Limited, Toronto, Ont.

## Latest Discovery Is

Weed-Killing Chemical

German Chemist Claims It Will Not Injure Canadian Soil

R. P. Stoldt, agricultural chemist of Germany, who has been experimenting with various chemical compounds on land near Yorkton, for the past three years, announces that he has at last discovered a preparation which will destroy weeds but at the same time is not injurious to Canadian soil.

Slightly more than three years ago a preparation was discovered in Germany which destroyed many kinds of weeds and at the same time was not detrimental to the soil, and this preparation has been used with much success by German farmers since. It was found, however, that owing to the difference between the German and Canadian soils that the preparation was too strong, for besides killing the weeds it was very harmful, in its Yorkton tests, to the soil. Since that time Mr. Stoldt has been experimenting until at last he has discovered a preparation which he claims will kill soil, this, pig weed, Canada thistle, quack grass and many others, but at the same time will not injure the soil.

The preparation, which is known as weed-kill, is easily dissolved, is odorless, is non-poisonous and does not harm wood, iron or leather, and destroys the weed with the root.

Weed-kill can only be applied to the weeds in the growing season, while the soil is still soft, and it is applied to a growing crop without hurting the grain. Many different kinds of sprayers can be obtained to spray the preparation. The smallest of which, known as the Distollet Kill, weighs only eight pounds and can be used for destroying weeds under the growing grain. Another hand-sprayer can also be obtained which will spray one acre per hour, while horse-drawn machines can be procured which Mr. Stoldt claims will spray one acre in thirteen minutes.

Lipton Buys Steam Yacht

St. Thomas Lipton, perennial challenger for the America's cup, has purchased the British steam yacht, "Albion," of 1,348 tons, from Captain Leodier, for use as his headquarters during the races for the famous sailing trophy which are scheduled to be held in United States waters seven months hence.

For Fresh Bites and Chills.—Chills come from undue exposure to wind and cold, and from the by winds of winter. In the treatment of either an excellent preparation is "Thomson's Cold Cream," which contains the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Inhabitants in ancient Pompeii were specialists in wall painting. Their plastered walls in rich, flat tones and in decorative medallions.

## Mind's—The Great White Liniment.

An eminent lawyer says: "As all lawyers know, law is the merriest game of chance in the world. The body has an idea what the law is in the first place, or how a judge will apply it in the second, or thirdly, when the jury will do."

## Don't Miss This

## Typhoid Carriers A Health Menace

Unfortunate People Carry Typhoid Germs and Start Epidemics

Several years ago a woman in New York City became known as "Typhoid Mary".

"Typhoid Mary" is one of those people who have become infected with the bacilli of typhoid, and although she is herself immune to the disease, she has passed on the germs to other people wherever she went. What made her all the more dangerous was the fact that "Typhoid Mary" was a cook, and persisted in pursuing that profession, regardless of the fact that the authorities told her that she was a menace to the health of every community with which she came in contact.

"Typhoid Mary"—whose real name is Mary Mallon—was discovered by Dr. George A. Soper, whose job as a sanitary engineer made him a doctor of sick cities rather than sick individuals. It was called by the authorities a mysterious epidemic that broke out in a summer home at Oyster Bay, six people out of a household of eleven were attacked. In order to find out the cause, the water supply was tested, the plumbing inspected, the milk supply inspected, even vegetables and fruits were examined, but no clue to the cause of the outbreak was found at any of these observations.

Dr. Soper went to work and followed up the health record of every person who had entered the house since the epidemic. He finally hit upon the information, that for a time that year the former cook of the household had been away and a new one had been engaged in the interval. The cook was, Mary Mallon.

The doctor started on the trail of the new cook. It led him along the route of the most amazing chain of typhoid epidemics that had been uncovered in years—in view of the fact that not one of the outbreaks had been from a known cause at the time. In one of the households where Mary Mallon, the cook, and the head of the house, had taken ill, Mary's employer thought that the epidemic in a manner in which she had helped around the house during the calamity that he gave her \$50 as a present.

It took Dr. Soper some time to locate Mary, and when he did find her, she was very little help to him in his mission, which was to protect the public from further exposure to the germs of which she was a breeding ground. She refused to give him any information, she refused to submit to bacteriological tests. She said that she could have been typhoid to anybody, although in the house in which she was working at the time, the daughter of the family had died of typhoid.

"Typhoid Mary" would not co-operate in any way with the authorities, so that they had no choice but to put her away for three years on North Brother Island. Examinations proved there, what the doctors had expected, that there would likely be typhoid epidemics wherever she went.

"Mary" said the city of New York for \$20,000 for putting her away, but she left her case. It was shown that she had caused an isolated case of typhoid in her people to contract typhoid. She even worked in such a fertile field as a maternity hospital—giving twenty-five people the disease there.

There are typhoid carriers like Mary Mallon—thousands of them, who constitute just as great a danger to your health and mine as this woman did to those people with whom she came in contact. Some of them have had typhoid, and the germs are still with them and found in their excretions. Other people like Mary have been attacked by the germs, and although they are in no danger of getting typhoid themselves, they pass it on to other people. And the worst of it is, that a percentage of the carriers in Canada are in regular contact with our food sources.

Typhoid carriers are apt to disbelieve that they spread the disease, and they are difficult for the authorities to handle, as in the case of Mary Mallon, for they feel under a great injustice if they are not treated in any way. For that you can hardly blame them. They should be willing and

even anxious to have a thorough bacteriological examination made of excretions and blood. If following this, they are proved to be "carriers," they should follow out the instructions given as to the best means of obtaining a cure.

In England some of the known carriers have been pensioned, so that the authorities could keep them where they would do no more harm. But there are carriers all over the world, including Canada, who are not discovered.

As time goes on, undoubtedly medical health officers will have more success in isolating carriers not to endanger the health of others any more than can be avoided. But in the meantime, we must be careful to protect ourselves from other unfortunate people. Although the health measures of your city or town may be the best, and although you know that typhoid is almost on the list of conquered diseases, it must be borne in mind at all times that typhoid carriers are a ever-present danger.

One of the first lessons from Mary Mallon is, of course, that people should not employ help for their household, without some investigation of the suggested employee's medical history. This is made doubly true because a large percentage of the carriers are women. So is one of the first lessons that you should not employ a person. "Have you ever had typhoid fever?"

And the help, when engaged should at all times be careful to keep themselves clean. And the kitchen clean, the cleaning room in the house. When there is typhoid in the house, it should never be forgotten that the disease is most generally, in fact, almost invariably, transmitted by the hands. For this reason, nurses are attacked by typhoid more than any other class.

Food should be safeguarded. Fruit brought from strangers should not be eaten unless washed or the skin removed. Food in restaurants that has to be handled after the cooking, like sandwiches, ought to be avoided if there is any doubt in your mind. No one should eat without washing the hands, even though there may be no apparent dirt there.

Remember typhoid fever is largely a disease of sanitation and personal hygiene. This is made doubly true because a great deal toward the avoidance of this disease by observing a few simple rules.

## Cleaning Up Canadian Herds

Great Strides Have Been Made in Eradication of Tuberculosis in Cattle

Tremendous strides have been made in Canada towards the eradication of tuberculosis in cattle. Fifteen years ago the Department of Agriculture, Ottawa, began the testing of cattle as the beginning of a policy which has now developed as to have removed all infected and diseased animals from the farms throughout the country.

A booklet recently issued by the Department of Agriculture, at Ottawa, bearing the title "Bovine Tuberculosis" describes the two main plans that are pursued by the Health of Animals Branch.

By the "Accredited Herd" plan, when a herd has passed two annual or three semi-annual tests without a reactor, the herd is designated a "Tuberculosis Free Accredited Herd." This plan is confined to herds that are wholly or in part purchased animals.

In defining the "Restricted Area" plan, the leaflet states that when two-thirds of the cattle owners of a definite area have signed a petition for the establishment of a restricted area, and the petition has reached the Minister of Agriculture, at Ottawa, through the Minister of Agriculture, of the province interested, testing and cleaning up is undertaken.

Under the various policies administered by the Department of Tuberculosis Eradication, one million four hundred and sixty-nine thousand, seven hundred and sixty-six cattle have been tuberculosis tested up to the eighth of October last.

## For Poultry Keepers

New Invention Is Water Heater For Chicken Troughs

An invention which will be of interest to every chicken fancier throughout Western Canada has recently been completed by R. Monociville, Regina. The apparatus is an improved water heater for chicken troughs or fountains.

The water heater works on a new principle, according to the inventor who has applied for the necessary patents. It can be operated either by electricity, gas, oil or charcoal lamps and keeps the water always from freezing, though not hot. The main feature is a conical centre section which heats the water from the top, down.

It is sometimes a pity that the man who talks like a book cannot be shot up like one.

## Canadian Hogs Improving

General Improvement As Result of Application of Hog Grading Policy

While it is generally understood that the hogs raised in Canada have been greatly improved during the past five years, the extent of the improvement may not be fully appreciated. In the report of the Minister of Agriculture, at Ottawa, for the past fiscal year it is shown that the production of hogs in Canada, classed as "select," has increased from 21.97 per cent. in 1925 to 16.88 per cent. in 1928. Some of the western provinces have shown the most rapid improvement, at Alberta gain of 2.12 per cent. to 6.83 per cent; and Manitoba from 0.69 per cent. to 11.15 per cent. In the province of Ontario where hog improvement has been intensely pursued for many years "select" hogs increased from 20.28 per cent. in 1922 to more than 25 per cent. in "select bacon" in 1928.

The general improvement in quality of Canadian hogs is the result of the application of the hog grading policy at the Department of Agriculture, at Ottawa, which has made it necessary to consider the matter of carcasses in relation to the value of carcasses from the standpoint of wholesaling and retailing bacon and pork products.

The principles of grading from the beginning have been the same, that is to separate the market stock into classes according to their market values. The changes that have been made from time to time, it is pointed out by the Minister, have been approved by the Joint Swine Committee which has represented the producers, packers, and the dealers. The latest modification which distinguishes between "select bacon" and "bacon" was prompted by the recognition that hogs not sufficient heavy for breeding to permit of these two grades.

## A Good Investment

Money Spent For Dairy Cows Is Practically Safe

In drawing a picture of the future of agriculture, Balcan, the noted statistician, claims that the "synthetic production of milk will be a reality and that the dairy cow will have disappeared. The idea is not original with Mr. Balcan. Henry Ford, motor king, made the same prophecy many years ago and then, to show how little wrong he had in his estimate, as far as the immediate future is concerned, established a large dairy herd to supply certified milk to the Ford Motor plant in Detroit. Many years have passed since then, but so far we have no effective substitute for milk and the production and consumption of milk and its products has just about doubled on this continent. Herbert Hoover says that the white race can not survive without the cow. Talk of synthetic milk will be all right for a long time, but it will not satisfy the farmer about his dairy investment. We know of few safer investments.

Professor, going over examination papers, to student—

"How do you account for your observation that nitrogen is unknown in Ireland?"

Student: "The text book distinctly says that nitrogen is not found in a free state!"

Mr. Beard—"I want something to wear around the dormitory."

Salsgriff—"How large is your dormitory?"

## TRAVELLING PASSENGER AGENT

T. S. WEBSTER, who has been appointed Travelling Passenger Agent for the Canadian National Railways at Saskatoon. Mr. Webster formerly was in the ticket office of the Canadian National station at Winnipeg, and for the past four summers he has been ticket clerk at Jasper Park Lodge. He succeeds F. N. McKenzie, who has been promoted to Ticket Agent at Portland, Ore.

## Has Created Good Market

Demand in Britain and Europe For Graded Foodstuffs From Canada

Grading of food products exported from Canada has had the effect, during the past two years, of greatly increasing the demand for foodstuffs from the Dominion throughout the British Empire, and in foreign countries. Dr. J. H. Grisdale, deputy minister of agriculture, broadcasting from Ottawa, told a radio audience that Canada was the first of this year's series.

The speaker stressed the case of Canadian cheese as an example of what grading had done. In 1922, he said, and for some time prior to that, Canadian cheese had been selling in England at a price one or two cents per pound less than cheese from New Zealand. Subsequently, with the advent of grading, the price had risen until now the Canadian product commands the highest price on the British market for imported cheese, two cents higher than the price paid for New Zealand cheese.

Dr. Grisdale sketched briefly the progress of other food products from the Dominion on the markets of the world subsequent to the institution of grading regulations. Canadian products had gained a reputation of being as good as any purchased to be, he said.

## Special Phones For Blind

The city of Paris has just completed installation of special telephones for blind subscribers which are proving very satisfactory. France has a great number of blind war veterans, the telephone service is an instrument with the Braille system which has been installed in the veterans' hospitals, and also in the homes of blinded soldiers.

Doctor—"The best thing you can do is to stop smoking and drinking, go to bed early and get up early in the morning."

Patient (considers a bit)—"And the best best?"

## Earthquake Menace

Scientists Say Danger of Repetition Of Quakes On Atlantic Coast Is Lessened

"The chances of our having another earthquake of the severity of last year's are considerably lessened than we can feel more secure now than before," it was stated at Halifax by Dr. J. H. L. Johnston, professor of physics at Dalhousie University. Referring "sensational" statements by New England scientists, that a succession of earthquakes could be expected in this section of the world, Dr. Johnston pointed to opinions voiced by eminent authorities that the recent settling of the Atlantic coast has made it more stable.

Preparations for future shocks should be made, however, by constructing buildings, especially larger types, so that they will withstand them if disturbances do come, Dr. Johnston said. Types of buildings which would not shake down before earth waves had been experimented with in Japan, he said, and had stood through recent severe quakes.

Similar work was being carried on in California as a precautionary measure against insurance available there.

Ability to predict when and where earthquakes would occur, so reducing their terrors would probably be gained by scientists through study of earthquakes, states Dr. Johnston, adding that it was the only way we had of studying the inside of the earth.

Have was wrought by earthquakes mainly in centres of population where people were massed under the threat of falling buildings and waves, he pointed out. There were six major shocks, "which make the whole earth tremble" and a total of 5,000 earth movements annually.

The earthquake of November 16, we caused by a drop in the sea bed in the St. Lawrence Gulf, Dr. Johnston stated.

## Oddities In Etiquette

People Have To Be Very Formal In Scandinavia

Etiquette in Scandinavia is a thing to be dreaded, especially in Sweden. Even the former should address a person by his full diplomatic, political, professional or commercial title. Thus one meets Mr. the Assistant to the Bank Manager, Wirsén, or Mr. the former Manufacturer of Blood Sausage, Olsen. Denmark is far less formal, both in speech and attire; but at the end of the dinner party the hostess will stand in the doorway and shake hands with every guest while he murmurs, "Thank you for the food," to which she answers, "I hope it will become you well."

Mr. De Smyth: "We had a lovely time last night. We had a box at the theatre."

Mrs. De Smyth: "Yes! Choccolates, weren't they? We saw you in the gallery eating something."

Lady (meeting an old acquaintance): "Just off to the cemetery, Mr. O'Brien. What sort of place is it?"

Put: "Sure, it's a lovely place—people are dying to be buried there."

The big trouble today is that many people believe that the right-of-way belongs to the one who gets there first.

## Utilizing The Empty Spaces

World Still Has Lots of Land Suitable For Cultivation

What seems waste land today may not be waste land tomorrow. Prairie lands that were once considered part of a "great American waste" are now the rich heart of our inland empire. The dreams of utilizing the vast spaces of the interior may not be mere dreams in another such short period as has elapsed since the opening of the railway to the Atlantic and Pacific Oceans. The jungles of Brazil may be made fertile, and the iron horses from our own two oceans. Men are thinking of the Arctic in commercial terms as well as before.

The new Hudson Bay railway which Canada has just opened does not lead into latitudes which in Europe would seem high, but it opens vast possibilities in our American Arctic. Already a reindeer herd has been started on a three-year trek from the coast of the Arctic. Reindeer breeding is already profitable, to the tune of several hundred dollars, within reach of the new railway, and the reaching of the new railway to Canada's far North is wrapped in air as clouds as hovered over the early months of the iron horses from our own two oceans. Men are thinking of the Arctic in commercial terms as well as before.

So the discovery of new coal seams in the Antarctic by the Byrd expedition offers something more than food for fantasy. The Antarctic coal hitherto discovered is of poor quality and inaccessible today; but let us not forget that Spitzbergen, almost as far north as Byrd's camp is south, has been producing commercial coal—half a million tons of it annually—ever since the great war gave capital the courage to develop its mines.

Northern Siberia is another region of unknown possibilities. When John Muir and his associates planted the American flag on Wrangel Island, nearly half a century ago the idea that such remote Arctic territory could be of use to foreign nations in human civilization seemed fantastic; it still seemed so to most of us when, a few years ago, a million tons of oil was discovered in the region. But today it is one of the centers of the search for Helium, with Russian colonies really established there, reporting on the weather daily by radio.

The current "Geographical Review" reports that in the Lena Delta, more than 80 degrees north, where there is as yet no continuous night wraps the country, watermelons ripen in the hot August sun. And this is an Arctic region as far north as that in which Helium is lost!

We have only begun to explore the possibilities of our planet.—New York Herald-Tribune.

## Scratch Grain For Hens

Amount Given Should Be Varied According To Weather

The amount of scratch grain to feed to hens varies with the different seasons of the year. In the winter when the nights are long and cold, hens need more of the heat-forging energy producing scratch grains than when the nights are short and warm.

Scratch grain should be fed an hour before the birds go to roost, so they will have time to clean it up before dark. Do not feed any grain in the morning as the hens are apt to fill up on it and then wait for it to digest before they eat any mash and obtain the egg building materials.

A message of nine words, "May God bless a long, happy, and prosperous life," was inscribed on a grain of rice and recently sent from the Delhi museum to an English official.

Teacher—Tommy, tell us what you know about Abraham Lincoln.

Tommy—He was born in a log cabin but he helped his father to build.

Germany has nearly 3,000,000 radio listeners.

"Smith's daughter is marrying a clay-potter tomorrow."

"Does he do much at it?"

"Nothing, or he would see that Smith is bankrupt."—Littell's Messenger, Berlin.

Three unusual views of their Excellencies, The Governor-General and Lady Willington, taken on a three weeks' cruise of the British West Indies. Scene No. 1 shows His Excellency Lord Willington, as he bids goodbye, from the rail of the Canadian National Steamship "Lady Drake," as he leaves Bermuda carrying their Excellencies on the last leg of their West Indies cruise. Scene No. 2 shows His Excellency Lord Willington, as he bids goodbye, from the rail of the Canadian National Steamship "Lady Drake," as he leaves Bermuda carrying their Excellencies on the last leg of their West Indies cruise. Scene No. 3 shows Lady Willington with one of the little boatmen who are used on the distinguished visitors to bid them welcome.

## WORLD HAPPENINGS BRIEFLY TOLD

Hon. T. A. Crerar has announced that he expects the report of the engineers of the National Railway on the short line from Winnipeg to Hudson Bay to be ready by the time parliament meets.

Further immigration of Doukhobors to Alberta during the coming season, some from the United States and from the colonies established in British Columbia, is predicted by Peter Verigin, head of the sect in Canada.

Proposals to form a Dominion-wide veterinary association were made at the annual meeting of the Manitoba Veterinary Association. H. H. H. of Brandon, former vice-president, was elected president.

Daylight saving time will be inaugurated in Montreal at one minute past midnight, Sunday, April 27, and at the same hour September 28. It was decided unanimously at a meeting of the city council.

A deal whereby between fifteen and twenty million dollars will change hands for the purchase of property to make the present Windsor Hotel, at Montreal, one of the largest on the continent, is under way, Montreal Press said recently.

British Columbia public debt totalled \$98,084,672 on January 1, 1930, as against \$25,887,253, on August 20, 1928, an increase of \$107,197,420, according to figures filed in the Legislature by Hon. W. C. Shelby, Minister of Finance.

Increased work at the Dominion Seed Branch offices, at Saskatoon, has necessitated the increase of the staff, according to the statement of Nelson Young, manager of the branch. Seed analysts have been added in order to cope with the work of analyzing all seed grain.

Ukrainians in Winnipeg are urging combined action against Soviet rule in Ukraine. Describing the Bolshevik rule as a "reign of terror," a meeting of the Ukrainians brought forth denunciations of Soviet government, declaring it undermined all fundamental institutions of the nation.

## Turkey Has Queer Problem

Asking for Help To Aid Country Of Wild Animals

The Turkish Government has asked the Merchants' Association, of New York, to put it in touch with an individual or an organization to undertake the killing of Turkey's wild hogs. A concession for the killing and exportation of the hogs may be arranged.

It was explained at the Turkish consulate that the religion of the natives does not permit them to eat swine. The wild hogs have ramped free and are now a serious nuisance.

Many a man says he can't afford the because business is too dull, Mehmy, but it wasn't government, under Noah built the ark.

There are now 1,500 airports in the United States.

**PURE RICH CREAMY COUNTRY MILK**  
 for all Baking  
 UNSWEETENED  
 Write The Review, Redcliff, Alberta, for the 1930-31 Catalogue.  
 W. N. U. 1825

**Briquetting Plant**  
 First Unit Of Plant At Bismarck, Sask. To Be Built This Year  
 The first unit of the Canadian Coal, Power and Briquetting Company (Bismarck), will be constructed during this year, according to Hon. H. H. Stevens, M.P., Vancouver.  
 This first unit will cost \$150,000 for equipment alone while the cost of the holdings secured by the company will bring this total to more than \$200,000.

It is the intention of this company to manufacture briquettes, dry coal and power at their mine, which is located in the Souris field, five miles south of Bismarck.

Steps are being taken at the present time to secure a stub line from the mine to the main line of the C.P.R. by Bismarck.

For the past year, E. V. Clanton, Broom, president of the coal company, has worked hard to interest Canadian financiers in the possibilities of the Southern Saskatchewan field. He has been successful and through his endeavors a new industry will be started in the province.

Hon. Mr. Stevens declared that he was acting on the advice of H. N. Freeman, consulting engineer, Vancouver. Mr. Freeman had carefully inspected the field and had been impressed with the great possibilities. While the original outline of the project will be modest in proportion to the possibilities of future development, Mr. Stevens declared that the success of the venture lay with the people of the Province—legion Leader.

**Winnipeg Newspaper Union**  
 (By Annette Worthington)

After experiencing some little difficulty in getting sufficient capital to embark on his ambitious enterprise, he was finally awarded the contract and gave orders for the construction of four paddle-wheel steamers of the following dimensions: 115 ft. gross tonnage, length 207 ft., breadth 34 ft., 2 ft. draft, 24 ft. depth, 24 ft. beam, a horse power of 140, and a speed of 8.5 knots. The vessels were named as the "Britannica," "Acadia," "Columbia," and were to be delivered in 1930 to carry on the mail contract awarded to Canada's company, known at that time as the British and North American Royal Mail Steam Packet Company. Perhaps the best known and most easily remembered of these vessels was the famous "Britannica," which was the first Canadian to cross the Atlantic under her own steam.

One of the proudest moments in Canada's history was only 40, 1840, when he set sail from Liverpool on board the "Britannica" for the first time, run for Halifax and Boston, the forerunner of the present great fleet of mail steamers, totalling nearly a million tons of shipping. After the battle with the British and the Atlantic for 17th, daily arriving in Boston a few hours later, where they were welcomed by the populace for his outstanding achievement, receiving no less than nearly 2,000 dinner invitations during the first day of his arrival in Boston.

Samuel Cunard lived to see his great conception take practical form, and was knighted by the British Government for services rendered during the Crimean War. He died in 1865 at the age of 78, when his son Edward followed in his footsteps.

Entering upon its 90th anniversary of steady progress in a life of service to the public, the present-day Cunard Line with its palatial "Berengaria," "Aquitania," and "Mauretania," aptly described as the greyhound of the Atlantic, together with a large fleet of coast vessels, maintains a regular service between the principal ports of Great Britain and the North American continent. Office of the company commenced recently on the satisfactory progress made during the past year when many thousands of passengers were conveyed to and from Europe with regularity and safety by the many vessels of the Cunard Line and its associated companies, which has a big increase over numbers carried during the preceding years. It is a confidence begotten of long years of experience, that the oldest steamship company operating on the Atlantic seaports, looks forward to an even greater era of progress in the years to come.

**Petroleum Production**  
 The production of petroleum in Canada during the year 1929, is estimated at 1,132,800 barrels, having a value of \$3,942,000, which compares with 621,184 barrels valued at \$2,035,300 in 1928, or an increase of 88 per cent.

The blubber of a whale, which lies just beneath the epidermis, varies in thickness from an inch to 10 or 12 inches, depending on the size and species of the animal.

Beggar: "And then both paragraphs said and left me orphan." Passenger: "Is that so? What are you going to do with it?"

## Old Steamship Company

The Cunard Line Is Celebrating Its 90th Anniversary Of Service

What assailed mariners' confidence in a remarkable feat was the "Mauretania's" recent feat of crossing the Atlantic between New York and England, which was accomplished in 10 days, 15 hours and 51 minutes, at an average speed of 25.45 knots. This time 24 hours and 11 minutes, at an average speed of 27.22 knots, registered between the same points last August. In view of the severe gales that have been experienced recently, which have made even a few days crossing will probably stand as the most outstanding on the high seas this winter.

It is interesting to note that this year the Cunard Line celebrates its 90th anniversary, which recalls to mind the exploits of that great Canadian, Samuel Cunard, founder of the Cunard Line, the oldest steamship company operating on the trans-Atlantic route. In 1793, of humble United Empire Loyalist stock, he directed his energies into the shipping business, and was a distributor of Her Majesty's mails in Canada, the United States, Newfoundland and Bermuda, which he transported in his fleet of 10-gun

1831 he became interested in the steam shipping, leading the list of subscribers who built the "Royal William," the first vessel to cross the Atlantic under her own steam. Fired with the possibilities of the future of steam propulsion, he conceived the idea of applying this new method to his own ships. Samuel Cunard, who was at that time well known on both sides of the Atlantic as a genius of business, and a man whose 40 ships provided the British Empire with one of the chief sources of their activities, left for England in 1833, in response to a message received from the Lord Commissioners of the Admiralty, asking him to submit tenders for the conveyance of Her Majesty's mails to the North American continent.

After experiencing some little difficulty in getting sufficient capital to embark on his ambitious enterprise, he was finally awarded the contract and gave orders for the construction of four paddle-wheel steamers of the following dimensions: 115 ft. gross tonnage, length 207 ft., breadth 34 ft., 2 ft. draft, 24 ft. depth, 24 ft. beam, a horse power of 140, and a speed of 8.5 knots. The vessels were named as the "Britannica," "Acadia," "Columbia," and were to be delivered in 1930 to carry on the mail contract awarded to Canada's company, known at that time as the British and North American Royal Mail Steam Packet Company. Perhaps the best known and most easily remembered of these vessels was the famous "Britannica," which was the first Canadian to cross the Atlantic under her own steam.

One of the proudest moments in Canada's history was only 40, 1840, when he set sail from Liverpool on board the "Britannica" for the first time, run for Halifax and Boston, the forerunner of the present great fleet of mail steamers, totalling nearly a million tons of shipping. After the battle with the British and the Atlantic for 17th, daily arriving in Boston a few hours later, where they were welcomed by the populace for his outstanding achievement, receiving no less than nearly 2,000 dinner invitations during the first day of his arrival in Boston.

Samuel Cunard lived to see his great conception take practical form, and was knighted by the British Government for services rendered during the Crimean War. He died in 1865 at the age of 78, when his son Edward followed in his footsteps.

Entering upon its 90th anniversary of steady progress in a life of service to the public, the present-day Cunard Line with its palatial "Berengaria," "Aquitania," and "Mauretania," aptly described as the greyhound of the Atlantic, together with a large fleet of coast vessels, maintains a regular service between the principal ports of Great Britain and the North American continent. Office of the company commenced recently on the satisfactory progress made during the past year when many thousands of passengers were conveyed to and from Europe with regularity and safety by the many vessels of the Cunard Line and its associated companies, which has a big increase over numbers carried during the preceding years. It is a confidence begotten of long years of experience, that the oldest steamship company operating on the Atlantic seaports, looks forward to an even greater era of progress in the years to come.

**Petroleum Production**  
 The production of petroleum in Canada during the year 1929, is estimated at 1,132,800 barrels, having a value of \$3,942,000, which compares with 621,184 barrels valued at \$2,035,300 in 1928, or an increase of 88 per cent.

The blubber of a whale, which lies just beneath the epidermis, varies in thickness from an inch to 10 or 12 inches, depending on the size and species of the animal.

## Britain Needs Largest Navy

Has Greatest Mercantile Marine and Longest Trade Routes In World  
 Whatever industries may be developed in Britain, shipping, which is one of the staple industries, and which gives employment to a huge number of men in other trades, is not one of them.

According to the latest returns of Lloyd's Register, the aggregate tonnage on the stocks at the present time is 3,110,880. Of this amount, 1,260,204 tons are being built in British shipyards, more than all the rest of the world put together.

For more than two hundred years Great Britain has been the maritime nation of the world, Britain has built more ships, has more ships in the water, and has eight times longer trade routes than any other nation on earth.

Whatever sacrifices Britain makes at the naval conference in order to arrive at an understanding—and she has already made greater sacrifices than any other power around the table—the fact should not be forgotten that she has the greatest mercantile marine in the world and the longest trade routes. That being so, she does need a navy commensurate with the policing of those routes to protect her food imports, without which she would starve in two months.

Premier Ramsay MacDonald was right when he said at the opening of the naval conference: "The navy is it."

## Night Winds In The Rockies

Meteorological Phenomenon Found In High Western Range

The night wind from the mountain tops is a meteorological phenomenon to be found among high mountains and noticeable in many places in Waterton Lakes National Park, in the province of Alberta. Warm air rises from the valleys during the heat of the day but at sunset a cool current of air from the peaks rushes downwards, bringing with it the scents of pines and larches and, it may be, of the flowers of some alpine meadow two thousand feet above. This downward current is frequently noticeable at Cameron Park at base of Mount Rundle, and in many other places in the park.

## Co-Operative Packing Plants

Farmers in Western Canada are becoming more and more favourable to a wider extension of the policy of co-operative marketing. Co-operative packing houses in the cities of Lethbridge, Calgary, and Edmonton, are to be established by the Alberta Livestock Pool. The original idea was for a centralized co-operative plant at Calgary, but this has been abandoned in favor of the three plants serving the southern, central and northern sections of the province.

## From Insulator To Conductor

New Material Offers Better Protection Against Lightning

Discovery of a new material named Thyrite, which offers better protection from lightning, was announced recently by the American Institute of Electrical Engineers by J. M. Macdonald, of the General Electric Company.

Thyrite is a compound, in appearance a cross between black slate and porcelain. Its name of Greek derivation, means gate, and for electrical current it is almost literally a gate in more senses than one.

For the ordinary current used in the industrial and household world, thyrite is a good insulator, a restrainer that keeps the current from jumping out of bounds, a closed gate. But when electricity becomes too ardent, thyrite "gives it the gate." If a tremendous overcharge comes along, the wire, such as a stroke of lightning, thyrite changes from insulator into a good conductor, offering a ready and harmless pathway for escape of the overcharge.

"What have you in the way of a drink?" "Three policemen and a Federal agent."

The first dental college was established in 1840, in Baltimore.

**1 Minute Ends Itch of ECZEMA**  
 "After years of experience, now in perfect health, I can say that I have never known a cold, cough, or croup, which was not cured by the use of Spohn's Compound."—J. H. Stevens, M.P., Vancouver.  
 POHN MEDICAL CO., Inc. V.C. Colton, Inc.

## Wealthy Americans

United States Has Two Billionaires and About Forty Thousand Millionaires  
 The United States has one or two billionaires, and about 40,000 millionaires, according to statistics of income for 1928, issued by the treasury department.

The statistics showed that of this number 498 persons paid income tax on annual incomes that totalled more than \$1,000,000 in 1928, the largest number in this class of wealth ever reported. In 1927, there were about 290 persons paying taxes on incomes of more than \$1,000,000.

A scientist predicts that the next war will be a wireless one. And sometimes it sounds as if it had started!

The first dental college was established in 1840, in Baltimore.

**Needless Pain!**  
 Nowadays, people take Aspirin for many little aches and pains, and as often as they encounter any pain. Why not? It is a proven antipain for pain. It works! And Aspirin tablets are absolutely harmless. You have the medical profession's word for that; they do not depress the heart. So, don't let a cold "run its course." Don't wait for a headache to "wear off." Or regard "neuritis," neuritis, or even rheumatism as something you must endure. Only a physician can cope with the cause of such pain, but you can always turn to an Aspirin tablet for relief. Aspirin is always available, and it never fails to help. Familiarize yourself with its many uses, and avoid a lot of needless suffering.

**ASPIRIN**  
 TRADE MARK REG.

**Make Your Windows Pay**  
 Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

**WINDOLITE**  
 THE ORIGINAL GLASS SUBSTITUTE  
 MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, cuts and fits, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet rays, which do not penetrate ordinary glass.

**USE WINDOLITE IN BROODER HOUSES LAYING PENS DAYING BARNES SUNROOMS ETC.**

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

### Interesting Local Items

The Medicine Hat Kennel club will hold a one day open point Show under C. K. C. rules, on June 19th.

Mr. B. Scanlan, of Medicine Hat, is busy these days making a new assessment of all town property.

Mr. W. Moran, of Lethbridge is spending this week in town visiting her parents Mr. and Mrs. P. Lavelle.

Word was received in Town this week stating that Chas. Conroy, at one time employed in the glass plant here, is dangerously ill in the hospital at Didsbury.

Don't overlook the bargains we are offering this week end and next Monday. Call and see our Bargain Table. P. Campeau & Son.

Mr. John Rutherford, who has been in the Medicine Hat hospital for the past few weeks, returned to his home Monday afternoon. He is now improving satisfactorily.

Archie Rose met with a nasty accident while engaged at his work at the Brick & Coal plant last Monday as a result of which he had his leg broken. He was standing beside a coal car to which was attached a slack cable. When the cable tightened to draw up the car it struck Mr. Rose with such force as to break his leg. He was immediately taken to the hospital by Dr. Ward.
